

**According to Wire Rope News and Sling Technology Magazine the SC&RA has released a new app for your iTunes or Blackberry**

### **SC&RA offers mobile app for crane hand signals**

The Specialized Carriers & Rigging Association (SC&RA) now offers a free mobile app for instantly accessing all necessary crane hand signals. The new app is available in the iTunes App Store and Blackberry App World.

Every signal included is compliant with the new OSHA Cranes and Derricks Standard, Appendix A to Subpart CC of Part 1926-Standard Hand Signals. Each signal is shown graphically so that operators can quickly and easily reference the appropriate signal for each command. All signals are available in English and Spanish.

This new apps is intended for use before entering the workplace. SC&RA does not encourage the use of Smartphones on jobsites.

The Specialized Carriers and Rigging Association (SC&RA) is an international trade association of more than 1,300 members from 43 nations. Members are involved in specialized transportation, machinery moving and erecting, industrial maintenance, millwrighting and crane and rigging operations, manufacturing and rental. SC&RA helps members run more efficient and safer businesses by monitoring and affecting pending legislation and regulatory policies at the state and national levels; researching and reporting on safety concerns and best business practices; and providing four yearly forums where these and other relevant member issues can be advanced.
